Hospital Charges vs. Medicare Payment, per Discharge

How to read this. Payments are Medicare's share only (Avg Mdcr Pymt Amt), discharge-weighted, and include per-claim add-ons (teaching, disproportionate-share, uncompensated care), so safety-net hospitals with few Medicare discharges can show payments above their charges. The scatter excludes hospitals with fewer than 20 discharges for the selected DRG; CMS suppresses provider-DRG rows under 11, so small and rural hospitals are underrepresented. Fee-for-service only; Medicare Advantage is not included. Maryland pays under an all-payer waiver, not IPPS, so its hospitals sit above the trend. Color scale runs from \$10,000 to \$20,000 so outliers do not compress the rest. Hover over a bar for the full DRG name. Source: CMS, Medicare Inpatient Hospitals by Provider and Service, 2024.
